PROFILE

Full-stack developer studying at IIIT College, proficient in Node.js, Express.js, React.js, and MongoDB. Experienced in building dynamic web applications and passionate about creating innovative projects. Eager to apply expertise in software development to contribute to challenging projects and drive impactful solutions.

PROJECTS

Phoenix

MERN - Web Application

- · A user-friendly and trusted platform for the trade of verified second-hand products. Our future goals include providing a platform for real-time auction/bidding of exclusive items and collectibles.
- · To create a seamless and secure marketplace for buyers and sellers, offering convenience and reliability in every transaction.
- · To revolutionize the online trading experience by fostering trust, transparency, and accessibility for all users.

To-Do List Application

- A user-friendly and efficient tool for creating and managing blog posts effectively.
- To provide a seamless and intuitive platform for users to write, edit, and publish their blog posts, enhancing creativity and engagement in the blogging community.
- To transform the way users create and share content by offering personalized insights, fostering creativity, and ensuring that every post reaches its full potential.

Gym Web Page

- User-Friendly Design: Our gym web page features a clean and intuitive layout, making it easy for users to navigate and find information quickly.
- TailwindCSS Integration: Utilizing TailwindCSS, the page offers a responsive and visually appealing design that adapts seamlessly to all devices.
- Comprehensive Information: Provides detailed sections on membership plans, class schedules, and trainer profiles, ensuring users have all the information they need.
